MODEL QUESTIONS - M.Sc (NURSING)

Instruction: Select the most appropriate answer.

1. Repair of cleft palate is preferred:
   (a) After 4 years of age    (b) Between 1 to 2 years of age
   (c) Below 1 year of age    (d) Between 6 weeks and 6 months

2. A child treated for celiac disease after discharge should avoid:
   (a) Banana    (b) Rice    (c) Wheat   (d) Rag i

3. Emotional development of toddler is:
   (a) Trust Vs Mistrust    (b) Sense of Autonomy
   (c) Imaginative and creative    (d) Shame Vs Guilt

4. Blalock – tausing shunt is done in child with:
   (a) Tetralogy of Fallot    (b) Brain - tumor
   (c) Pulmonary disease    (d) Tongue – Tie

5. Projectile vomiting is a characteristic feature of:
   (a) Esophageal Atresia    (b) Wilm’s tumor
   (c) Pyloric Stenosis    (d) Duodenal Atresia

6. The commonest presentation of childhood tuberculosis is:
   (a) Primary Complex    (b) TB meningitis
   (c) Disseminated Tuberculosis    (d) Bone Tuberculosis

7. A coagulation disorder is due to inherited deficiency of factor VII I
   (a) Thrombocytopenia    (b) Purpura
   (c) Leukaemia    (d) Haemophilia

8. Solution used for correcting dehydration in diarrhea is:
   (a) 5 % Dextrose    (b) Normal saline
   (c) Albumin    (d) Ringer lactate

9. The play needs of toddler is
10. The characteristic position for the relief of dyspnea that is taken by children with Tetralogy of Fallot is
   (a) Supine          (b) Fowler’s
   (c) Knee chest (d) Squating

11. Following tonsillectomy the nurse suspects haemorrhage post-operatively when the child is
   (a) Snores Noisily  (b) Becomes pale
   (c) Complains of thirst  (d) Swallows frequently

12. Fredet-Ramstedt’s procedure is a surgical correction of
   a. pyloric obstruction   b. cardiac – sphincter obstruction
   c. Intestinal obstruction  d. Hip dislocation

13. The antibody which is most abundantly present in breast milk is
   a. Ig A          b. Ig E   c. Ig G    d. Ig M

14. Causative organism of rheumatic fever is
   a. Virus   b. Streptococcus  c. Fungus  d. Staphylococci

15. Narrowed foreskin of the penis is otherwise called as
   a. Phimosis  b. Cryptorchidism
   c. Epispadias  d. Hypospadias

16. The first aid management of a patient with hypoglycemic attack is:
   a. Offering a glass of glucose water  b. Administer insulin
   c. Administer oral hypoglycemic agent d. Maintain NIL per oral (NPO)

17. The classic signs of shock includes all except
   a. Pale, Cool, Moist skin  b. Rapid weak, Thready pulse
   c. Increased blood pressure  d. Concentrated Urine

18. Rovsing’s sign is elicited in patient with:-
19. A drug of choice for a patient with congestive cardiac failure is:
   a. Cyclophosphamide
   b. Digitalis
   c. Streptokinase
   d. Methotrexate

20. A typical pain that a patient experiences after above knee amputation is
   a. Viselike
   b. Squeezing
   c. Excruciating
   d. Phantom

21. Which one is the side effect of nitroglycerine?
   a. Vomiting
   b. Diarrhoea
   c. Headache
   d. Backache

22. The chief clinical symptoms of cancer cervix is
   a. Metrorrhagia
   b. Dysmenorrhoea
   c. Amenorrhoea
   d. Menorrhagia

23. A sprain is an injury to
   a. Bones and joints
   b. Ligaments
   c. Soft tissues
   d. Muscles

24. A confirmatory diagnosis for pulmonary tuberculosis is
   a. Mantoux test
   b. Chest X ray
   c. Sputum test for AFB
   d. All of the above

25. A diagnosis of AIDS is made when an HIV infected patient has:
   a. A CD4 & & R cell count below 200/ml
   b. An increasing amount of HIV is in the blood
   c. A reversal of the CD4 : CDS ratio is less than 2:1
   d. Oral hairy leukoplakia infection caused by Epstein – Barr virus
26. As soon as the patient enters a post operative intensive care unit, the priority assessment by the nurse should be:

a. ECG monitoring   
b. Airway patency and respiratory status  
c. Level of consciousness  
d. Urinary output

27. Appropriate nursing action when caring for a hospitalized patient with severe neutropenia includes:

a. Oral care and Red blood cell administration  
b. Strict hand washing and frequent temperature monitoring  
c. Perineal care and platelet administration  
d. Monitoring lung sounds & blood pressure.

28. The nurse is suctioning a client who had tracheostomy. What is the maximum amount of time the nurse should suction the client at one time.

a. 10-15 seconds   
b. 20-25 seconds  
c. 25-30 seconds   
d. 30 seconds

29. Which of the following signs & symptoms would the nurse include in a teaching plan as an early warning sign of laryngeal cancer.

a. dyspnea  
b. Airway obstruction  
c. Stomatitis  
d. Hoarseness

30. What diet should be implemented for a client who is in the early stages of cirrhosis of liver.

a. Low fat, low protein  
b. High caloric, high carbohydrate  
c. high carbohydrate, low sodium  
d. high protein, low fat.

31. Evidence based practice is defined as:

a. The integration of best research evidence with clinical experience and patient value  
b. Scholarly inquiry of Nursing and biomedical nursing research  
c. Nursing care based on alternative medical  
d. Quality nursing care provided in an efficient economically sound manner.

32. The founder of modern nursing is:

a. Dorathea Dix   
b. Clara Barton  
c. Florence Nightingale  
d. Harriet Tubman
33. The first technique the nurse employs when conducting a patient’s physical examination is:

a. Palpation    b. Percussion
c. Inspection    d. Auscultation

34. Holistic Nursing regards and treats the:

a. mind, body, spirit of patient  
b. desires and emotions of patient
c. Brain, nerves, spinal cord
d. the whole body of patient

35. A client who smokes two packets of cigarettes/day is most risk postoperatively for:

a. infection  
b. Hypotension
c. Pneumonia  
d. Cardiac dysrhythmia

36. The engaging diameter of brow presentation:

a. Biparietal    b. Suboccipitofrontal
c. mentovertical    d. occipitofrontal

37. Hyperemesis gravidarum affects the absorption of the following vitamin.

38. The gut of the fetus develops from the:

a. ectoderm  
b. endoderm
c. mesoderm  
d. yolk sac

39. At term placenta weighs about _________ of baby’s weight:

a. 1/2 - 1/3rd  
b. 1/3rd - 1/4th  
c. 1/4th - 1/5th  
d. 1/5th - 1/6th

40. Show is characterized by:

a. lightening  
b. dilatation of cervix
c. Bloody mucus discharge  
d. amniotic fluid discharge

41. Hydatiform mole is primarily a disease of

a. before the onset of labour  
b. To speed up labour  
c. After the delivery of the baby  
d. After the expulsion of placenta

50. Abortion act was started on

a. 1957  
b. 1967  
c. 1971  
d. 1980

51. The early deceleration of fetal heart rate is commonly associated with

a. compression of head  
b. Compression of cord  
c. short cord  
d. Prematurity

52. Vaginal examination is contraindicated in a women suffering from

a. PIH  
b. syphilis  
c. APH  
d. Obstructed labour

53. Drug of choice for the treatment of eclampsia is

a. iron  
b. magnesium sulphate  
c. zinc sulphate  
d. Aspirin

54. The hormone which causes the ejection of milk is

a. Prolactine  
b. Oxytocin  
c. prostaglandine  
d. progesterone

55. Full bladder during the labour will cause all except.

a. obstruction of foetal head  
b. inhibit uterine contraction  
c. rupture of membrane  
d. delay in labour.

56. What test is done to find out the redoxical chlorine in H2O

a. Methylne blue test  
b. Orthotoludine test  
c. Displacement test  
d. Prisemption coliform test

57. Horrocks apparatus is used for

a. Water testing  
b. Milk testing  
c. Urine testing  
d. Specific gravity testing

58. The looking power of the air can be increased by
a. the globe thermometer  b. silvered thermometer  
c. Kata thermometer  d. wet bulb thermometer

59. Teropheral is otherwise known as

a. Pyridoxin  b. vitamin D  
c. Vitamin E  d. Vitamin A

60. World environmental day is celebrated on

a. June 5th  b. December 1st  
c. September 7th  d. June 8th

61. The first case to come to the attention of the investigator is

a. Primary case  b. Inolea case  
c. Notified case  c. All of the above

62. Which of the following is live vaccine

a. meastes  b. rabies  
c. tetanus  d. diphtheria

63. Retrospective study is known as

a. case control study  b. Analytical study  
c. Cohort study  d. Demographic study

64. Measles Vaccination is to be given in the age of

a. 1 - 3 months  b. 5 – 8 months  
c. 9 – 12 months  d. After 2 years

65. Child survival safe motherhood (CSSM) programme was launched in the year of

a. 1980  b. 1990  
c. 2000  d. 2007

66. "Population coverage by a PHC should be 40,000". This was recommended by

a. Mudhalia r committee  b. Bhore committee  
c. Mukerjee committee  c. None of the above

67. Community health nursing training in India was first started in
68. Describe spacing between 2 children is
   a. 1 year       b. 2 – 3 years
   c. 3 – 5 years  d. 5 – 7 years

69. Congenital anomalies in children due to genetic cause is
   a. Chromosomal abnormalities  b. Advanced maternal agents
      c. Infective agents         d. Physical agents

70. A pregnant women should visit the health centre at least
   a. 2-3 times       b. 3-4 times
   c. 5-6 times      d. 7-8 times

71. Paranoid means

72. Mental health act came into amendment in the year

73. A state of clouded consciousness in which attention cannot be sustained

74. Severe Mental Retardation is
   a. 21 – 35   b. 70 – 90    c. 51 – 70     d. 36 – 50

75. Client displaces his feelings, likes and dislikes over to the Therapist
   a. Transference    b. Sublimation    c. Counter Transference    d. Repression

76. Compulsive drinking is known as

77. The deterrent used in antabuse therapy is
   a. Methadone    b. Dopamine    c. Disulfiram    d. Epinephrine
78. Repetition of words or phrases heard is termed as

79. Therapeutic blood lithium level is
   a. 0.8 – 1.2 m.Eq/L   b. 0.6 – 1.2 mEq/L
   c. 2.5 – 3.0 m.Eq/L   d. 1.5 – 2.5 mEq/L

80. Irrational fear of situations is termed as

81. The indication for Electro convulsive therapy is
   a. Severe depression   b. Severe Hypertension
   c. CVA               d. Recent Myocardial Infarction

82. Mc Naughten’s rule came into existence in the year
   a. 1845  b. 1843  c. 1943  d. 1945

83. The first psychiatric nurse was
   a. Dorathea Dix     b. Linda Richards    c. Pepleam     d. Maria Jones

84. Irregular repeated movements is called as
   a. Posturing   b. Waxy flexibility     c. Tic     d. Mannerisms

85. Euthymia refers to

86. Family therapy is a concept coined by

87. The ideal dosage of succinylcholine during ECT is
   a. 0.25 mg/kg   b. 0.75 mg/kg   c. 0.50 mg/kg   d. 0.40 mg/kg

88. ECT is contraindicated in
89. Autism is grouped under
   a. Specific developmental disorder     b. Behavioral disorder
   c. Emotional disorder              d. Pervasive developmental disorder

90. Global cognitive decline present in
   a. Delirium   b. Dementia       c. Detoxification   d. Intoxication

91. A nurse being answerable for her work is called

92. The scientific study and statement of all the facts about a job with its contents is termed as
   a. Auditing              b. Job analysis     c. Budgeting          d. None of the above
