

*Dwarakesh, a final year, Mechatronics Student, Kattankulathur Campus*

“ I had the great privilege last year to attend the SAP. I came to know that SRM had signed a MoU with Tokai University, one of the leading private Universities in Japan. My areas of interests include Robotics and Automation. I thought to myself, what better place to study Robotics than Japan, the motherland of robots. I was excited and enthusiastic to start my semester at a new country. I was overwhelmed by the caliber of the professors and research scholars. I wouldn't be exaggerating when I say that I saw the pinnacle of academic excellence. While returning I brought back not just souvenirs but also this newly gained experience for the benefit of my Department and SRM” said Dwarakesh, a final year student from the Department of Mechatronics.

“I have to say that I am truly grateful to SRM University for providing, forgive me for the clichéd phrase “Opportunity of a lifetime.” To say the least SRM has been to me what a father

is to his son, a guiding hand, a bright torch, expanding my horizons and envisioning my success. I can stand here all day long and inspire you but alas time is a limitation” he added

“... the bright young minds of tomorrow will lead the way to a global SRM, to a Global India” he said addressing the students.
