

Capillary DNA Sequencer

Specifications

- Chemistry: Sanger chemistry
- Capillary Length compatibility: 28cm, 36cm, 50 cm, 80cm
- Number of Capillaries: 4, 8, 16
- Sample format: 96-well standard plate
- Computer: All the necessary computational units with required operating system should be provided.
- Software: All the necessary software for the sequence generation and analysis should be provided
- Read length expected: Upto 900bp
