

## **Capillary DNA Sequencer**

### **Specifications**

- Chemistry: Sanger chemistry
- Capillary Length compatibility: minimum 36cm
- Number of Capillaries: **4/8**
- Sample format: 96-well standard plate
- Computer: All the necessary computational units with required operating system should be provided.
- Software: All the necessary software for sequencing and fragment analysis should be provided
- Read length expected: Upto 900bp
